Panskura Banamali College (Autonomous)B.Sc.(H)

3rd Semester Examination , 2022

Subject: BCA Paper: CC6T

Paper Name: Object Oriented using C++

F.M.: 40 Time: 2 Hours

---

1. Answer any four questions: 4 x10 = 40

a. What is abstraction? Give example. What is conditional operator? Give an example. [(2+3) + (2+3)]

b. What is function overloading? How does function overloading implement polymorphism? Explain it with example. 2+3+5

c. What is scope resolution operator? Write an example of inline function. What is abstraction? Explain with example of ternary operator. 2+3+2+3

d. Define I/O stream. What is constructor ? Explain with example. 3+2+5

e. What is inline function? How is it used? Explain with an example 2+3+5

f. What are various methods for opening a file in C++. Under what circumstances is each one of them preferred? 4+6
