Panskura Banamali College (Autonomous)

B.Sc.(H) 5th Semester Examination 2022 (Online mode)

Subject : BCA **Paper: DSE1T**

Paper Name : Programming using Python

F.M. : 40 **Time : 2 Hours**

Answer any four question **4×10=40**

1. a) Define function. Write the syntax to define a function. Give example of function.

b) Write a program to calculate simple interest. Take principal amount , rate of interest and number of years from the users.(Hint: simple interest=(principal amount*rate of interest*no. of years)/100)

5+5

2. How to multiple assignment in python? Which function are uses for input output statement in python ? Write a program in python to convert Fahrenheit to celcious. 3+2+5

3. What are the difference between list and tuple? What is lambda in python? Write a program in python check the biggest one from three numbers. 3+2+5

4. a) What is variable ? What are the rules for declaring a variables.

b) Explain any five arithmetic operators in Python. 5+5

5. a) What type conditional structure present in Python programming. WAP in Python to check whether a given number is Armstrong or not.

b) What is list? Explain with an example. 5+5

6. Write short note 5×2=10

(a) Selection

(b) Length function on string

(c) Python break statement

(d) Numbers in Python

(e) Command line argument in Python
