Panskura Banamali College (Autonomous)

B.Sc. 2nd Semester Examination , 2022

Subject: Computer Science Paper: GE2T

Paper Name : Introduction to Programming

F.M.: 40 **Time : 2 Hours**

A. Answer any four questions: **4×10=40**

1. a) Define Program.
   b) Write and explain various steps involved in development of a program. 4+6

2. a) Write the general syntax and working of *Switch* statement and *goto* statement used in C language .
   b) Why arrays are useful?
   c) What is polymorphism? 6+2+2

3. a)Differentiate the following :
   i. break and continue
   ii. While and do-while statement.
   b) What is Constructor. Describe various types of Constructor. 3+3+4

4. a) Discuss the necessety of flowchart.
   b) List different data types available in C along with their storage requirement.
   c) Write the importance of *typedef*. 4+4+2

5. a) What are the importance of storage classes in C?
   b) Briefly describe different storage classes available in C .
   c) Write down limitation of an array. 3+4+3

6. a) Why '&' is used in *scanf()*?
   b) What is the importance of *#include* in c program?
   c) What is operator-Overloading?
   d) What is constructor and destructor? 2+2+2+4
