Panskura Banamali College (Autonomous)

B.Sc.(H) 2nd Semester Examination -2021 (Online Mode)

Subject: Computer Science **Paper: GE2T**

Paper Name: Introduction to Programming

F.M.: 40 **Time : 2 Hours**

Answer any four questions : **4x10=40**

1. Define with example Variables , constants , keywords , data types , operators . 5×2

2. Write down the syntax with example Printf() , scanf() , getchar() and putchar() , cin and cout , getc() and putc() . 5×2

3. Briefly explain logical and bitwise operators with example. 5+5

4.a) What is Function overloading? Write a program to find the area of circle and rectangle using function overloading.
b) What is one dimensional array? How it can be initialized in memory?
c) What are the different logical operator in C ? 5+3+2

5. What is loop ? Why we need it ? Explain three kind of loop with syntax and example . 1+1+8

6. a) What is inheritance? State the characteristics of the inheritance?
b) What is polymorphism? Difference between class and structure .
c) State automatic/local, global/external, static resister variable in c. (1+2)+(2+2) + 3
